Dear Mary,

I am in receipt of the University Senate's report and resolution regarding Charge S-2005, Student Governance. Please thank the University Structure and Governance Committee for its efforts to assure that student governing associations are recognized in University Policy. Your recommendation to add a final sentence to University Policy 50.2.1, section C concerning student elections to the Senate seems reasonable and prudent, and it has my support. I will also share your resolution with the Chancellors so they can act on your recommendations to list and link to student governing associations on their units' websites (if they are not already doing so) and to share your final recommendation with their student affairs units, which deal most regularly with student government entities.

Sincerely,

Jonathan Holloway
President & University Professor
